Statement of interest:

Project: **M**agneto**a**coustic Interaction in **S**ynthetic **M**agnetosomes towards **I**maging and **T**herapy (Acronym: MACSMITH)

Dear Prof. Goya,

We, LIPOMIZE SRL, a pharmaceutical development company specialized in liposomal technology and nano/microformulations, hereby declare our agreement to collaborate by providing our expertise in the MACSMITH project, related to the optimization of the production of mangnetosomes at laboratory scale.

The objective of the MACSMITH project is closely related to the medium and long-term objectives of our company, focused on the development and technological transfer of innovative nano formulations that can be activated locally to exert their therapeutic effect.

For this reason, we agreed to collaborate with your work group at the University of Zaragoza, in all those conceptual and experimental aspects in which Lipomize has expertise. We observe a potential synergy between the work capabilities of Dr. Goya's group and those of our R&D laboratory. Consequently we expect very positive results from this interaction.

Sincerely,

  
LIPOMIZE S. R. L.  
ALCIDES NICASTRO  
SOCIO GERENTE
